Venue	Department of Zoology
Resource Person	Dr. R. T. Chaudhari , Dr. S. D. Chate & Dr. S. K. Thorat
Organized by	Department of Zoology
No. of Participants	20

A Brief Report

Vermicompost is organic waste converted into manure with the help of worms. Vermicomposting can be done for self use, alternate income or commercial purpose. Earthworms feed on the decaying organic matter and survive in soil. During digestion in the alimentary canal, all the organic waste gets transformed into natural fertilizer. The pH is neutral and it is an odorless organic matter.
